DETAILED ACTION

An RCE was filed 12/15/2003. This case was filed 12/22/2000 and claims benefit from Provisional Application 60/171,615 (filed 12/23/1999). Claims 1-7 have been canceled by paper dated 11/14/2003 (entered by the filing of the RCE papers). Claims 8-10 are before the Examiner.

Claim Rejections - 35 USC § 102/103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 8-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Poyet (CA 121:339, 1993).

Poyet teaches RN 118202-59-8 (N-(2-chloroethyl)-N'-[4-(1,1-dimethylethyl)phenyl]-urea). Poyet teaches that this compound affects the protein synthesis on the two proteins present in the tubulin in human breast cancer cell line. This anticipates or makes obvious the instant claims.
